# AMOL BAGUL

Android Developer | Kotlin | Jetpack Compose

+91-8806827021 | amolbagul947@gmail.com | LinkedIn | GitHub | Portfolio | Leetcode

## SUMMARY

Android Developer with 2+ years of experience building and maintaining native Android applications using Kotlin, Java, Jetpack Compose, XML, MVVM, REST APIs, Firebase, and Room. Experienced in developing production features, integrating third-party APIs and services, handling Android permissions, and troubleshooting application issues. Contributed to live applications published on the Google Play Store.

## EDUCATION

**Ssvps B.S Deore College Of Engineering**, **Dhule** - *B.Tech*, *Electronic Engineering* - *(GPA: 7)* **Sep 2021 — Jul 2025**

**Jr City Junior College**, **Dhule** - *HSC (12th)*, *Science Stream* - *(GPA: 82%)* **Jun 2020 — Feb 2021**

**Shree Agrasenji High School**, **Dhule** - *SSC (10th)* - *(GPA: 73.60)* **Jun 2018 — Jun 2019**

## SKILLS

**Languages:** Kotlin, Java
**Android:** Android SDK, Jetpack Compose, XML, Material 3, MVVM, Room, Navigation, Runtime Permissions, Coroutines
**Networking:** REST APIs, Retrofit, Volley
**Firebase & Services:** Firebase, Crashlytics, Google Analytics, AdMob
**Tools:** Android Studio, Git, GitHub

## WORK EXPERIENCE

### Twinr
**Android Developer** **May 2026 — Present**

- Developed and maintained production Android applications using **Kotlin and Jetpack Compose**, contributing to two live applications published on Google Play Store.
- Implemented features involving **Firebase, Room, REST APIs, third-party APIs, localization, and Google Cloud services**.
- Integrated **ElevenLabs Speech-to-Text API** and implemented audio-related functionality including waveform visualization, trimming, playback speed and format options.
- Implemented Android runtime permission handling across different Android versions and device-specific permission behavior.
- Integrated **Google AdMob** including banner, interstitial and rewarded advertisements.

### Trifrnd Pvt. Ltd
**Android Developer** **May 2025 — May 2026**

- Developed and maintained native Android applications using **Kotlin, Java, Jetpack components and REST APIs**.
- Built responsive application screens using **XML and Jetpack Compose**.
- Implemented **MVVM architecture** for maintainable application structure.
- Integrated REST APIs using **Volley** for dynamic data and message synchronization.
- Developed real-time one-to-one chat functionality with message status, timestamps and online/offline indicators.

## PROJECTS

**Caller ID, On-going** **Aug 2026 — Present**

- Currently developing a **Caller ID application** using Kotlin and Jetpack Compose.
- Working on identifying incoming callers and displaying caller information during incoming calls.
- Implementing Android **call-related permissions and background functionality** while handling different Android versions.
- Developing responsive UI and user flows using **Jetpack Compose and Material 3**.
- Integrating backend/API services for caller information and application data.
- Working on application analytics, crash monitoring, and production debugging using **Firebase Analytics and Crashlytics**.
- Implemented an **after-call screen** to provide relevant caller information and actions after a call ends.

**Galleria,** Link **Jul 2026 — Present**

- **Technologies:** Kotlin, Jetpack Compose, Android SDK, MediaStore, MVVM
- Contributed to a production gallery application focused on **photo management, privacy, storage optimization, and media organization**.
- Developed the **Quick Photo Edit** functionality allowing users to **crop, rotate, and adjust photos**.
- Worked with Android media/photo APIs to handle and manage images within the device gallery.
- Implemented UI components for the photo editing workflow using **Jetpack Compose**.
- Worked on production-ready functionality while maintaining a smooth and responsive user experience.
- Added **GPS location-based photo features**, allowing location information to be associated with photos and used within the gallery experience.
- Developed a **drawing/brush tool** with multiple brush designs for annotating photos.
- Worked on media management features including **private vault, favourites, screenshot cleanup, recycle bin, and album organization**.

**Recordit,** Link **May 2026 — Present**

- **Technologies:** Kotlin, Jetpack Compose, MVVM, Firebase, Room, AdMob
- Developed audio recording functionality with **live waveform visualization and post-recording preview**.
- Implemented audio **trimming, playback speed controls and format selection**.
- Integrated **ElevenLabs Speech-to-Text API** for audio transcription.
- Implemented local data management using **Room Database, SharedPreferences and internal storage**.
- Handled runtime permissions including **microphone, notification and storage** across Android versions.
- Integrated **Google AdMob** with banner, interstitial and rewarded advertisements.

**Trifrnd Connect (Android App)** **Oct 2025 — Jan 2026**

- **Technologies :** Kotlin, jetpack REST API's, MVVM Architecture, Android Studio
- Developed a **real-time one-to-one chat application** supporting message sending and receiving via REST APIs.
- Designed dynamic **chat UI using RecyclerView** with sender and receiver message alignment.
- Integrated **Volley networking library** for efficient API communication and message synchronization.
- Implemented **auto-refresh messaging using Handler and Looper** to fetch new messages without blocking the UI.
- Added features like **read/unread indicators, timestamps, and online/offline user status** to enhance user experience.
